

Rambo Keyboarding

Instructions:

- Go to any local fabric store and purchase 2 yards of camouflage fabric. Cut into long strips. You will need enough strips for every student in your class.
- On “Rambo” day partner your students.
- Have students open up their textbooks to a timing or a group of lines if they have not learned the entire keyboard.
- Have students set their timing software for three minutes or you can manually time them.
- One partner is to put the blindfold on and place their fingers on the home row. The other partner is to dictate the timing to the student.
- The goal of the exercise is for the typist to be able to type both accurately and with speed without looking at their keyboard or screen.
- This activity also works for beginners if all of the students put the blindfold on and the teacher dictates the keys to the student.
